3. Contestants must be at least 14 years of age, but not have reached his or her 19th birthday as of January 1 of the year in which this event is held.
4. All contestants must be members of 4-H in the state they are representing during the year in which this event is held and participation eligibility must be certified by the State 4-H Leader.
5. Certification of participation eligibility should consider the following: “This contestant has not participated in post-secondary course work in the subject area of the national 4-H competition, nor has he or she participated in training for post-secondary competition in the subject area of the national 4-H competition.” See details below.
 - A. Post-secondary undergraduate students may participate in and/or complete freshman and sophomore level equine management or communications courses. Students completing a junior, senior or graduate level equine and/or communications course are ineligible to participate in the National 4-H Horse Competition.
 - B. Students are ineligible to participate in a National 4-H Horse Competition if they are currently enrolled in courses that provide specific training for the competitive event in which they are participating. For example, student participation in collegiate horse judging events, on intercollegiate horse judging teams and in intercollegiate communication events would eliminate a 4-Her’s eligibility to participate in the National 4-H Horse Competition.
6. Contestants (including team alternates) may participate in only one contest per year at the Roundup. After competing in this contest, they are ineligible to compete in the same specific contest again. CUTS

The Eastern National 4-H Horse Judging Contest ha adopted the recommended Cut Scale of

the National Horse Judging Team Coaches' Association, That scale is given below and we encourage all states to consider its adoption.

<u>Cuts</u>	<u>Description</u>
1	Horses are extremely similar; no obvious reason why one should be placed over the other; or both horses have numerous faults and none supersedes the others; placing is strictly a matter of personal preference; placing varies among the official judges.
2	Horses are very close, but one horse has one or two qualitative or quantitative advantage; the majority of official judges would not switch the pair, but half of the contestants could logically switch the pair.
3	Horses of similar quality, but there is some logical placing in favor of one horse; either one horse has several advantages or one has several faults; all official judges would agree on the placing; no more than one third of contestants would be expected to switch the pair.
4	Horses are not of similar quality; one horse has several decided advantages based on many points; all experts would quickly see the placing; no guesswork or personal preference required to make placing; no more than 10% of the contestants would be expected to switch the pair.
5	Large numbers of extreme differences between the horses; placing is obvious to everyone on first, quick observation; careful study not required for the placing; pair consists of an inferior horse vs. a consistent winner; only very inexperienced, uninformed contestants would switch the pair.
6	Horses not even comparable; differences reflective of a champion quality horse or performance vs. a horse or performance that is not of show quality.
